

ATLANTIC Machinery

Our digital snip saw provides a faster, safer and more accurate means of cutting either spacer or georgian bar. The operator can remain in one position adjusting the stop distance with an easy to use wheel and digital display. The clamping and cutting of the bar is then achieved by pressing the foot switch, making it impossible for any blade related accidents.

- Quiet machine designed for constant running.
- Left to right or right to left feed.
- Removable swarf tray.
- 415 Volt, 3 Phase and compressed air.
- 250mm TCT or high-speed steel blades.
- Overall length 6500mm.
- Cutting station 500 x 500 x 1300mm.

Digital Spacer Bar Snip Saw

Rotary Sealing Table

The rotary sealing table allows controlled sealant application of your pre-assembled glass units at an adjustable speed and comfortable working height.

- Fixed speed electric rotation
- Rotation in 90° increments
- 4 vacuum cups hold glass firmly
- Working height fixed at 950mm
- Minimum glass size 120 x 120mm using adaptor plate
- Maximum glass size 2100 x 1200mm
- Rotation and suction by foot control
- 415 Volt, 3 phase and compressed air.
